White / Oliver

MIKE & TAMMY YUSKO

A brief history about White/Oliver

The Oliver Farm Equipment Corporation was the name created after a merger between Oliver Chilled Plow Company, Hart-Parr Tractor Company, the American Seeding Machine Company, and the Nichols and Shepard Company in 1929.
The Hart-Parr Tractor Company is in large part responsible for coining the term "tractor" (from their early traction engines). The Oliver Farm Equipment Corporation later shortened their name to "Oliver Corporation".
They were perhaps best known for their "Fleetline" models built between 1948 – 1954, though many today prefer to collect the older, Hart-Parr models. The White Motor Company acquired Oliver Corporation in 1960 and discontinued using the Oliver name in 1974. The White Motor Company was acquired by AGCO in 1991. AGCO now owns the rights to the Oliver name, but they do not use it on modern machinery.

Tips on ordering an engine piston ring set:

Measure old rings before ordering. Do not order by tractor model only. To ensure you order the correct rings, you will need the following information:

1 Bore size
2 Thickness of each ring
3 Quantity of each ring thickness per piston

Piston rings can not be returned if opened. Call or email for price and availability of other sizes.

Piston ring sets - USA made

Part #	USD	Application

From a satisfied customer!

"Every order gets shipped quickly and perfectly. Never had any issues with our orders or with customer service. Only place we order tractor parts from! The added cow tails are a plus, it's the first thing my husband looks for with every purchase." - Jurnee B.

Distributors vs. Magnetos

A distributor requires a battery and coil to operate. A magneto is self sustaining, meaning it does not require a battery to operate and has a built-in coil.

What is back spacing?

To determine back spacing lay your wheel flat on the ground with the back of the wheel facing up. Lay a straight edge across the wheel & measure the distance from the back side of the mounting surface to the straight edge. (I.E. The wheel pictured has a back spacing of 3-5/8").

Front wheels / rims

NOTE: To determine the width of Rims / Wheels: Measure the inside (bead to bead) not outside to outside. See page 400B.

Mylar decals

Oliver models below 1951 always had red model numbers. Oliver models 1951 & newer had yellow decal (including yellow model numbers). All decals are USA made.

Tips on applying our decals

All decals are mylar unless otherwise noted. Have the pitted area filled, sanded smooth and painted. Paint must be completely dry prior to installation (usually 3 - 4 weeks). Wash area with soap & water (new paint included) on which decal is to be placed.

For mylar decals (film between lettering): Trim to border of design where possible prior to removing white backing paper. Lightly spray the area with window cleaner (do not use window cleaner in aerosol can). Peel white backing paper from decal and place in position. Squeegee window cleaner from under decal beginning in center and working outward. If air bubbles occur, puncture with pin & smooth down. **Please note:** These decals have been printed on a tough mylar film using mylar ink. A pressure sensitive adhesive has been employed on the back of the mylar to insure good adhesion to any clean, hard surface.

For vinyl cut deals (no film between lettering) Special order only: Peel backing paper from decal. The decal will be stuck to the application paper. Align the decal using the design, not the application paper, and firmly press decal into place. Slowly remove the application paper starting at one corner. **Please note:** The colors are fused into the vinyl eliminating stacking. CAUTION: Inspect all decal pieces before applying to tractor.

Service manual reprints - Printed in USA

A service manual reprint tells you how to take the tractor apart, how to fix it and how to put it back together again. It is a reprint of the manual that the factory furnished the dealer's shop service department, and was not sent or given to individual retail customers. It deals with repairs in the language of a mechanic. Often times it includes valuable information as to specifications, torques, etc. A service manual reprint will offer many short cuts and save you time!

Operator manual reprints - Printed in USA

An operator's manual (reprints only) sometimes referred to as the owner's manual is the manual that came with the tractor. It is the manual that was given to the ultimate consumer by the manufacturer. It can be compared to the manual you receive in the glove box of a new car. This manual gives the owner-operator instructions, shift patterns, capacities (anti-freeze, crankcase, etc.) and adjustment procedures (brakes, clutch, etc.) This is a very useful and valuable tool in operating your tractor.

Parts manual reprints - Printed in USA

A parts manual (reprint only) has exploded views of all parts on the tractor. With numbered pictures giving you great detail on assembly and disassembly. It also gives you a guide, with numbers, for ordering parts, and makes you seem much more informed when talking with a dealer. Many service manuals, after telling you how to disassemble & repair in detail, will simply say "reassemble". If you have your PTO in the wash tank, in pieces, without notes, you have a problem. The parts manual can help you out with an exploded view of the PTO unit, and you can see immediately how it all goes back together. You need a parts manual!
